**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of embodiment 1, figure 1, claims 1-6 in the reply filed on 6/5/2009 is acknowledged.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims rejected under 35 U.S.C. 102(b) as being anticipated by Hirohashi et al. [JP 2002-033226.]

Hirohashi et al. discloses a transformer having a structure in which a transformer body/assembly [3, 5] is accommodated in a case/frame [2] having a rectangular-parallelepiped shaped, the case/frame is filled with resin/filler, and the resin/filler is hardened, wherein the case has one open face for accommodating the transformer body/assembly [3, 5], side faces located at border of opening are partially removed [2a], and tape [6] is attached to cover the removed areas.

Regarding claims 2-3, Hirohashi et al. inherently discloses at least one of the side faces is partially removed at the removed area, wherein the removed area located so as to leave edge areas other than edge areas of the side faces, close to the opening.

Regarding claim 5, Hirohashi et al. discloses the core/coil assembly [3, 5] being coated with filler/resin.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirohashi et al.

Regarding claim 4, the specific arrangement/winding of the tape would have been an obvious design consideration for the purpose of providing strength to the casing/frame.

Regarding claim 6, the specific of the tape would have been an obvious design consideration for the purpose of improving adhesion.
